

## **Spirituality in Religious Education**

Through Religious Education at Heartwood, we enable spiritual development by learning about different worldviews, faiths, feelings and values. We enable the time and space to be reflective about our own beliefs and perspective on life.

We teach our children about the world around them and encourage them to reflect on their own experiences. Discovering their current beliefs in and comparing this to other beliefs and worldviews. Children learn to be respectful of different faiths, worldviews and spiritual beliefs.
